

Scott Young
Tenants harbor

Hello, I am a commercial fisherman from tenants harbor ,me. I am asking that you listen to the fishing community about not putting wind turbines in the gulf of maine. They do not belong in the ocean, they would be better suited on the side of a hilltop, or even better no where at all. They do not last long enough to pay for themselves, they kill birds, not to mention whales . Solar panel farms are a much better idea I think. Please stop the industrialization of the gulf of maine, it's only a big money grab for politicians and foreign companies. Please do not let these huge pieces of junk litter our gulf!
