Senator Lauren, representative Barry, distinguished members of the joint standing committee on energy, utilities, and technology. I am here to ask for your support for LD101, as a fisherman's wife of the gulf of Maine I truly believe that these floating windmills will cause great environmental damage to the gulf. I feel the risk is too great with so many unknowns and unanswered questions about the impacts on the marine habitat. Again I strongly oppose any floating windmills in the gulf of Maine because of my fear of what it will do to the birds, marine mammals, and all living things in the ocean. Which is why I strongly urge you to support bill LD101, thank you.
