I strongly encourage the legislators to pass this crucial bill. It will make cleaner, safer, and more affordable living accessible to more Mainers than ever, and will also help protect the environment that we all value and depend on. In our household we need to reduce our expenses on utilities- we burn wood, propane, and also pay too much to Central Maine Power. We want to install solar on the barn roof, with excellent southern exposure. This bill might help us afford to do that project.

Thank you!
