This Groundbreaking New Plastic Battery Will Disrupt The Whole Industry  
<https://www.youtube.com/watch?v=DTe-scTUNyg>

Maine GHG is now 49% from transportation.  
Maglev SkyWay by MicroRail is more efficient than battery-electric.

USDOT/USDOE collaborative office is developing EV capability for fleet deployment.  
EV is disproportionately negative for underserved populations.  
EV early adoption has been severely ineffective until the technology matures.
