

Mark Chasse
Auburn
LD 1606

LD 1606 ought-NOT-to pass as this bill is tantamount to coercion by the government using my taxes to promote a view that other mainers do not support. This is especially true for supporting an energy source which is NOT renewable, creates destruction of land by digging up 500,000 lbs of earth to harvest minerals for one car battery. Then the batteries still need to be charged by fossil fuel generators.

Thank you.
