Deer Isle
LD 1895

I am supporting LD 1895. Please keep them out of LMA1, as this further endangers ocean sealife, which have already seen the effects in other areas, and places a severe detriment to the fishing industry, which has prided itself on being sustainable. Keeping the windmills, if we must have them, within LMA1 will not only kill off sealife, but it will destroy the Maine lobstering industry in a whole.
