I am writing in support of this bill. I believe if wind power is coming to the gulf of maine, then we must take the necessary steps to ensure that it is done in a responsible manner; and that means no construction within LMA1. Incentivizing union labor contracts, who've tied their support to the fishing industry will provide economic benefits to our state.

No one wants wind power where we fish, and I believe this bill will help keep the future of our state and LMA1 waters free from turbines.
