1. (L.D. 26) Bill "An Act To Allow a Dentist To Administer Botulinum Toxin and Dermal Fillers" (SP0034) (EMERGENCY) (Presented by Senator BRENNER, S. of Cumberland) Submitted by the Department of Professional and Financial Regulation pursuant to Joint Rule 204.

Regarding L.D. 26- Licensed dental professional are the most appropriate professionals to administer Botulinum Toxin and dermal fillers. Their extensive education makes them very qualified to perform this procedure. Presently, if an LPN is authorized by a medical doctor he or she may administer Botulinum Toxin; disallowing licensed dental professionals is an oversight that should be corrected by adding it to the scope of their practice
