Health Coverage, Insurance and Financial Services

Good Morning:

I am submitting this testimony to oppose LD 1045.

I am both an older person and educated as a marriage and family therapist. I do not wish to lose my personal health care coverage and have it replaced with a universal health coverage that will dictate which doctor to see and potentially place me on long waiting lists for services as we see in Canada.

I vehemently oppose LD 1045. And urge the committee to vote "ought not to pass."

Thank you,
Annie Christy
