

William Clark  
Brunswick

Our son is 42 and a writer (seeking recognition, of course)! Because Health Insurers are making big profits and wasting huge amounts on administration and also causing Hospitals and providers to waste money on administration, costs are too high. He cannot afford health insurance, makes a living at carpentry, not eligible for Medicaid. He thinks he will avoid accident and illness. We wish him luck, but know he will likely need care. (He is avoiding getting dental care for his dental problems, already!) Please vote OTP for Rep. Brooks' bill LD 1045.
