

Linda Reardon  
Orrington

This is purely a tax scam. I was clinical coordinator for a speciality clinic for 5 years dealing with pediatric diseases. Many people with the advent of Obamacare simply took the penalties because they can not afford coverage. Small businesses stopped hiring because they could not afford premiums or laid people off. This bill is so horrible and vile there are no words. I was constantly on the phone with speciality hospitals trying to get care for people who could not pay premiums because they got laid off because small businesses couldn't pay for their insurance and they could not pay the premiums. The affordable care act is NOT affordable for anyone. I spent hours of time I should have spent caring for these sick children trying to get life depending surgery's with billing departments trying to just get them accepted into hospitals. Even those who did have Mainecare would have to be on deaths door or die before getting accepted. If you feel I'm not being truthful contact me and I will give you truth that should make you cry. This bill is a ploy for taxpayers by this administration and that's it. It will put more small businesses out of businesses and kill people who can't afford these gross premiums. And they are high please don't buy into the lies.
