

Megan Marquis
China Village
LD 1533

Dear Health Coverage Insurances and Financial Services Committee,
My name is Megan Marquis, and I live in China Village. I am writing today to ask you to support LD 1533.

This affects me and my lifespan because it's another huge barrier to healthcare. I am incredibly frustrated that we need a proposed policy to correct what is currently legalized extortion for medical care. Just because similar care happens in another building, doesn't mean Health providers get to overcharge. Insurance companies already do that. So why should healthcare providers be allowed to follow in their extortion like footsteps too? Where will the extortion end? Just stop this before more Mainers become financially bankrupt trying to access healthcare.

So support LD 1533 or be comfortable being complicit with extortion like practices that ultimately kill people earlier than they're supposed to, by making care even more inaccessible.
