My family and I utilize CareCredit to help us receive the care we need. CareCredits promotional financing has helped me be able to access my own health, vision, and dental care, my dogs veterinary care, and my family to receive the care they need all with no interest. Without CareCredit I wouldn't have been able to breach the gaps that the Americans extremely poor health insurance system leaves for ordinary citizens. My dog recently had a dental clean that I would not have been able to afford without 12 month financing through CareCredit. Later in the same year he had a bad bout of pancreatitis wherein CareCredit really saved me financially. I am able to acquire rewards on everyday purchases with the same care and apply those rewards toward essential care. This card has become a fail safe for my family and I and without it I likely would not seek my own medical care at all as it's far too unpredictably expensive for simple care. I appreciate your time with my story and there is so much more I could say about how CareCredit has relieved me financially, but these veterinary stories are my most recent experiences that made it possible for me to continue on with everyday life.
