

MATTHEW Simko
42 North Dental
LD 2174

If enacted, this bill would limit options for patients to pay for healthcare expenses over time, potentially reducing access to essential care. Many patients rely on financing options to cover healthcare costs that insurance may not fully cover, and restricting these options could force patients to delay or forgo necessary treatments. In dentistry, this can have disastrous consequences. LD 2174 could unintentionally exacerbate healthcare disparities by limiting access to care for those who cannot afford to pay upfront.
