LD 227

LD227 is dangerous to all American families. The idea that Maine will hide a child from their parents is disgusting. That you would prevent law enforcement from helping a parent find a child; revolting!! Children are vulnerable, impressionable. They require the protection and guidance of loving parents. The state is NOT a substitute for parents. This bill would allow a child to be brought to Maine, hidden from lawful, biological parents, and to be permanently mutilated. To be physically altered for the rest of their lives. The state does not allow a 14yo to get their ears pierced without parental consent. I took my daughter to have her ears pierced for her 14th birthday. I had my ID but had forgotten her birth certificate. They turned us away. But in your new Maine, an unrelated adult could take her to the hospital to have her breasts removed. INSANITY!!!! The fact this is even being considered is sick and deranged. Anyone supporting this should be recalled! If you have any decency, any moral compass, or regard for what is true; you will vote ought NOT to pass.
