Hampden
LD 227

I am adamantly opposed to the bill LD 227, An Act Regarding Health Care in the State. This bill clearly undermines the authority of parents trying to raise their children in a climate clearly not conducive to children being allowed to be children. Our kids are not mature enough to make life-altering decisions on their own and decisions about gender identity etc. should not be allowed in children as they are still developing and growing mentally, physically and emotionally. They are in no way ready for making these decisions that will affect the rest of their lives. I hope this bill is trashed as it should be. It is absolutely ridiculous. Maine and our legislators have disappointed me once again.
