

Marguerite Chaffee
Dixmont
LD 227

Dear representative and Perry and members of this committee. My name is Marguerite Chaffee and i am from dixmont Maine. Thank you for hearing my testimony today regarding LD 227, and act regarding healthcare in the state of Maine.

Ld 227 is a direct attack against the children and families not only of Maine but of all 50 states. This bill's intent is to strip away all rights of parents to make wise decisions for their own children and allow those who do not have the authority to make life - altering decisions for them instead.

Make no mistake this is an attack on life and truth and the foundation of family, our nation, and our freedom. We must not accept this evil compromise.

Our state and the entire country will pay a great price if you move forward with LD 227. We will be held accountable for innocent lives being altered or destroyed and most importantly we will be held accountable before the living God who gives us life.

We know the truth and must speak the truth in these dark days that we live in , we will all be held accountable if we remain silent.

Please listen, and allow truth and life to remain. You have been given a great responsibility by the state of Maine and its citizens. Please vote "ought NOT to pass" on LD 227.
