

Alicia Collins
Sidney
LD 227

Honorable members of the Committee on Health Coverage, Insurance and Financial services thank you for the opportunity to testify about LD 227 - An Act Regarding Health Care in the State.

My name is Alicia Collins. I'm a resident, voter, and selectman in the Town of Sidney.

I'm beyond shocked at the language of this bill and completely disappointed with parents around this State.

Where are the momma bears and strong fathers ready to defend their children when the big bad wolf comes knocking?

Where are they as Maine attempts to destroy any chance of them ever having grandchildren.

Oh that's right! They're slaving away to make money to pay their bills because this administration continues to tax and spend.

Tax and spend.

While they are at their jobs - expecting the people they've elected to be making the best choices for their hard earned dollars - Democrats in Augusta are on the take to big pharma, Planned Parenthood and Maine Family Planning.

There is no other explanation for why anyone would support child mutilation and mass murder, when kids test scores are declining.

I remember as a kid, my mother took us to see her family in Western Massachusetts during the school year.

I don't know the complete story, but the school board, maybe it was the Superintendent, wanted to know why I wasn't in school.

My mother said what every parent should be saying right now, "This is my child, and I will raise her as I see fit."

You see, my mother understood and wanted to teach us our family values - God, Family and Country. These are worth cherishing and developing. These are the values that last.

Sex, death and destruction - these are temporary - these are the things of Democrats here in Augusta and across America. Short sighted ideas which are destroying our State, enslaving her people and dumbing down our schools.

I urge this committee to vote ought not to pass.

I urge this committee to protect families. Let children be kids. Stop sexualizing schools.

Thank you,

Alicia Collins
