

James Culbertson
Belmont
LD 227

I am writing AGAINST LD 227 of the 131st Legislature as amended as of March 5, 2024. I am opposed to abortion in principle. I, along with thousands of other Mainers, view abortion as the taking of a human life. While there may arguably be limited cases in which abortion may seem sensible (as in the cases of the endangered life of the mother or rape), this legislation makes allowance and provision for abortion in general and at any stage. Further, I do not believe that Maine should become a sanctuary state for abortions or gender reassignment. It seems we have misplaced actual science, based on unbiased observations, systematic experimentation, and recording of those observations as facts with preferred science, based, not upon observable data, but predetermined outcomes. Observable biological scientific study reaches different conclusions about the beginning of life and the place of biological gender than what we are being forced to accept and even underwrite via our taxes than is be called for in this purported "healthcare" legislation. I stand opposed to this legislation.
