

Brian Drinkard
YORK
LD 227

Vote NO on LD227.

This bill provides for the abhorrent practice of the mutilation of children. It would make Maine a destination for people who wish to mutilate their children. It would place our state on the wrong side of history. In time, the country will look back on this insane period of our history with the same derision attached to slavery. We should protect children, not condone this nonsense. It is impossible to change genders. We do not want to be an example of the dearth of morals that would condone this "medical" practice. Children with "gender issues" need psychiatric help and moral support, not irreversible physical damage that often leads to mental health issues and suicide.
