Machias
LD 227

To those serving on the Committee On Health Coverage, Insurance and Financial Services, I am writing to you in opposition of LD 227. This bill is not providing health care but is offering our state as grounds for destruction of children and families. Not only does this bill disregard the values of the people of Maine, but oversteps the rights of people across our country. Please consider to begin to fight for God's original design for people and for families instead of seeking to be an aid in tearing it apart and destroying the foundation of our culture: the family. One man, one woman, and the children they are blessed with. Again, I deeply oppose this horrible bill and urge you to consider the voices of the people of Maine and oppose this bill also. Thank you for your time.
