LD 227

Regarding LD 227: I would like to state I am vehemently opposed to this Bill. There are too many obvious reasons to be opposed to the "kidnapping" and abuse of children. Maine is going backward, not forward. Time to follow the science - countries in Europe including Sweden have all stopped doing surgeries on children recognizing that children cannot make these kinds of permanent life-altering decisions when their brain frontal lobes are not fully developed. In addition, the studies are all showing kids who become "transgendered" have a higher risk of suicide than those who do not change genders (contrary to the lies being told to parents). It's time to stop and do some thinking critically - why has this whole social issue "suddenly" come to the forefront of our culture when it wasn't even on the radar 4 years ago???? Why the push to divide parents from their children??? Who could be behind this??? Hint: What country's kids are surpassing us in education? It's time to return to common sense folks. Our schools are pathetically failing - kids can't read or write or do math and know absolutely nothing about our history or our government because the powers that be are too busy confusing our youth by pushing to cut off body parts. The callous disregard for life (it begins with abortion) is creating a violent society and a generation filled with depression, despair and suicide. God help us if Maine becomes the "We Butcher Children State".
