To Whom It May Concern:

I am a mother of two little girls and when I read about the new “law” being brought to the table on the actual legalization of essentially kidnapping young children from their parents, to either mutilate and or murder an even more innocent and defenseless child with in, I was absolutely MORTIFIED. Put abortion and genital mutilation to the side however and let’s focus on your main goal through this bill...taking AWAY parental rights! We as parents grew these children in our own bodies, delivered them through excruciating pain and suffering, spent countless hrs walking the halls to quiet them at night and raise them under OUR authority NOT the governments. To say I am shocked by this brazen idea that A GOVERNMENT could legally kidnap children and preform such horrific acts on them is mind boggling. Picture an ordinary citizen kidnapping a young child, crossing state lines, murdering her baby or cutting off a piece of his body. They would 1000000000% go to prison. But here you are saying that the same rules don’t apply to you because you’re from the government. Evil is as evil does and you, state of Maine, are drowning in it. Don't pass this law. Don't take away parents god given rights. How dare you even suggest it.

With no pleasure at all,

Georgia Hall
