Testimony of Brian Johnson
Against LD 227

An Act Regarding Health Care in the State
Members of the Committee,

I oppose LD227. This is not for Maine, or for anyone's best interest. LD 227 hurts kids and will increase sex trafficking in Maine. It would make abortion and gender affirming surgeries a right --and ultimately a tax burden on the people of Maine. LD227 would also undermine the power of our own state's courts to protect the children of this state...and of others. Please do not allow this bill to pass. Our children are our future and this bill allows for abuse of the worst kind. Our state is known as Vacationland--a place where families come to enjoy each other's company--If this passed our state would be known as the place where adults who are potentially non guardians could flee to with children--all for the purpose of abortion or gender affirming surgeries. Is this really the "way life should be?"
