LD 227

I am concerned about bill LD 227, "An Act Regarding Health Care in the State," establishing Maine as a sanctuary state for ALL abortion and transgender medical care. It's imposing on parental rights, and permitting state-sanctioned kidnapping of minor children against their parent's will.

I am concerned we are causing great harm of gender confusion in the lives of our children. And we are allowing men in women's dressing rooms, and bathrooms, and to compete in women's sports as women. And I concerned as well as allowing women to invade men's privacy as well in dressing and bath rooms.

We have a misunderstanding of family. To have a family with children requires procreation. Husband and wife of the same sex cannot procreate.

And common sense, from a physical perspective man looks like and is a man, and a women looks like and is a women. We have lost common sense.

We are infringing on the rights of parents concerning their children. I am concerned that we are becoming a police state, an erosion of our rights and freedoms as citizens of the state of Maine and the United States by obtrusive Government.

And I am concerned the violent taking of innocent life, a baby in the womb by abortion.

Please vote NO for LD 227.
