Indiana
LD 227

Committee Members -

Undoubtedly, the predominant arguments advocating for the passage of this bill will revolve around claims like "children will die/commit suicide" and "parents are abusive."

I'll provide a straightforward justification for you to not pass LD 227 Every so-called "expert" that transgender advocacy groups champion has essentially taken cues from the World Professional Association for Transgender Health (WPATH).

This afternoon, March 4th, 2024, an enormous amount of leaked files and videos came out of WPATH. The leaked WPATH Files reveal "that the organization does not meet the standards of evidence-based medicine, and members frequently discuss improvising treatments as they go along. Members are fully aware that children and adolescents cannot comprehend the lifelong consequences of "gender-affirming care," and in some cases, due to poor health literacy, neither can their parents."

If you just want to see some of the video clips to see how WPATH themselves know that "gender affirming care" is pseudoscience, posted by the law firm that is helping a few detransitioners file lawsuits:

We'll all know that no child is born in the wrong body. This is all a social contagion. But whether you agree with that or not, LD 227 in front of you is all based on horrific, unethical lies and pseudoscience. The organizations that wrote this bill for the authors knew that, which is why there are so many protections built in place for the inevitable lawsuits.

Vote ought not to pass when you get into your working session. You'll be glad you did when this entire transgender cult falls apart.
