I support and align my thoughts with Bishop Robert Deeley

A proposed bill to create new rights for “gender-affirming care” and “reproductive health care” in Maine law is a direct attack on the beauty and truth of human life as embodied in the natural reality of the human family. It is both unconstitutional and immoral.

Children especially are harmed when they are told that they can "change" their sex or, further, be given hormones that will affect their development and possibly render them infertile as adults. Parents deserve better guidance on these important decisions, and we should urge our medical institutions to honor the basic medical principle of "first, do no harm." Gender ideology harms individuals and societies by sowing confusion and self-doubt. The state itself has a compelling interest, therefore, in maintaining policies that uphold the scientific fact of human biology and supporting the social institutions and norms that surround it.

Please please protect undeveloped vulnerable children and their families and vote AGAINST this bill!
