Maine Public Hearing Testimony – Work Session for Joint Standing Committee on Health Coverage, Insurance and Financial Services - Legislation - LD 227  
Thursday March 21, 2024

Senator Bailey and Representative Perry and Members of the Joint Standing Committee. My name is Robert Manchester a resident of Turner, Maine. I am presenting written testimony in opposition to LD 227.

The thought of the State of Maine becoming a sanctuary state is horrifying to me.

Legislatures in Maine want to extend a welcoming hand and financial incentives to mothers across the USA that wish to abort their babies in the Pine Tree state. I'm the father of two adopted girls from China so, I am very familiar with abortion. Abortion on an industrial scale!! Most Mainers do not want this industry in this state!!

Also, I have learned it will encourage the mutilation of young boys and girls in the name of this new and unproven psychological "science" called "gender affirming care". Just recently, the famous television star Dr Phil was explaining the damaging effects this "transitioning" is having on kids across the country. He says the "science" being used to promote this dangerous fad is pure garbage.

I do not want Maine to move deeper into this dark world of dehumanizing and denuding children. They are too young to know what life can bring. They are innocent. They are made in the image of God. What does God think about the "Law Makers" of the Great State of Maine? Is it really The Way Life Should Be?

The history of the United States includes many instances of horrific medical mistakes and malpractice. This is the latest. Please stop the MADNESS.

Vote Ought Not to Pass
