LD 227

Those in support of this bill use language such as, “care, protect, needful, safe, healthy”. Is suicide, mental depression, and ruined lives healthy? If they truly care about the people they say that they are trying to protect, then why is their focus on making sure that there is full access to the very things that are proven to cause suicidal decisions and depression? Why don't the people who loudly say they care find out the causes for people wanting to mutilate their bodies and believe a lie, and then give real solutions that will actually be a help? Instead they are concerned with protecting the practices that make so much money. The love of money is the root of all evil. Please oppose LD227.
