When did we become a state that does not care for children in the right to life? When did we decide that we were God and that there was no supreme being? When did you decide that you do not work for your constituents anymore and that you work for the people who pay you off? This bill is a travesty nobody in this state wants this to pass, this makes me doubt your ability to be in office for rational decisions God help you all don't know on this bill do not make Maine anymore of the laughing stock of this country.
