

Aura Moore  
Machias  
LD 227

Senator Bailey, Representative Perry and members of the Legislative Health Care, Insurance and Financial Services Committee,

My name is Aura Moore, I live in Machias, Maine and I writing to testify against LD 227, An Act Regarding Health Care in the State. This bill does not help children it puts them own vulnerable positions By removing a doctors approval for these services it stripes the patient from essential rights that they deserve to have such as hearing the importance learning the full risk, benefit, alternative informed consent that is needed before making a decision to change their body with life altering drugs, procedures, and/or surgeries.

This bill is extremist in nature in theory it may be attempting to protect vulnerable people but it actually puts them in a more vulnerable position.

This bill ensures immunity from litigation which is a dangerous precedent to establish. There are many people who have undergone these auguries to later have complications and harm done to their body, they later regret or are in the vulnerable position of self harm and are art high risk for suicide.

This bill is not good for Maine. The bill will actually promote trafficking to our state this is not what we want. Maine can not even take care of its own people Maine tax payers do not want this burden.

This bill indicating such a big of a change in Maine law should not have been snuck in on a Friday.

Please reconsider your support of this bill and vote no.
