

Thomas Moyer
Kennebunk
LD 227

I ask that you oppose LD 227.

Gender affirming health care should not be elevated to a right. Gender affirming health care fails to improve the life of many young people in the long run and causes health problems in the long run. European gender clinics have found this to be true and stopped medical treatment of youth under 18 years of age.

Please see the website biologicalintegrity.org for specific information on how best to offer support for transgender youth.
