I am against this bill. Human trafficking will be at an all time high. The government and teachers Union supporting "gender care". Which is not care at all. Do you personally want to support either one of these? Do you have children in your family? Abortion is way outside of birth control. You, each of you supporting these, will come in account of judgement. Even animals don't change their sex or want to abort their babies. You have supported a lie and now trying to put in law. Shame on all who support this bill. I and others do not want our hard working money to pay for something so terrible. You are to work for We The People in Maine.
