Members;

As a Maine resident, legal citizen of the U.S., a taxpayer, a mother, and grandmother, I greatly disturbed that you would even consider this horrific bill. Is it not bad enough that Gov. Mills lied to us when she said she would not alter the abortion laws in the state. Now we can legally kill babies in the last moments before they are born.

You now propose that we become a so-called sanctuary state for any one to come here and destroy a life and if that is not bad enough we are going to meddle in a private decision between a child and their parent to possibly destroy someone's life. And who is supposed to pay for this? The poor people of Maine? We are already paying for countless illegal migrants. Well if you try to turn Maine into California. Guess what. Moral and ethical people will move away. Normal Maine residents don't want this.
