LD 227

As a parent and a concerned citizen for the well-being of our young people, LD 227 ought not to pass.

This proposed Bill is evil . Interventions to align a young person's appearance or physical body with their gender identity as experienced and defined by the patient is evil. My child, our children , lack the maturity to decide as a patient to decide about having sex change surgery or interventions. This is child mutilation advocacy and will lead to a great amount of problems and suicides in Maine. A child should not be allowed to be taken across state lines to have sex change surgery or as stated: "interventions to suppress the development of endogenous secondary sex characteristics". Those who would profit from this are the pharmaceutical and big medical entities .

LD227 would make Maine a trans-sanctuary state and invite human trafficking and abuses to prosper. This is evident in a quote statement : "A law enforcement agency may not knowingly make or participate in the arrest or extradition pursuant to an out-of-state arrest warrant for violation of another state's law against providing, receiving or allowing a child to receive gender-affirming health care".

Another alarming quote: "It is the public policy of (Maine) that an out-of-state arrest warrant based on violating another state's law against providing, receiving or allowing a child to receive gender-affirming health care or gender-affirming mental health care is the lowest law enforcement priority."

LD 227 would lead to physical health issues, physical mutilation and mental health troubles. Trans trafficking of minors would make Maine a place of confusion for our kids and would invite child abuse regardless of where minors live. Parents and police would have no rights in this process.

Maine should not be a sanctuary state for God' precious unborn babies. The unborn must be protected as they are created in God's image and are each given a human soul. Each unborn , and each person is a gift from God for his will and destiny in the life we share. The unborn need to be welcomed and loved as our future citizens.

LD 227 ought not to pass.
