Where do we end with your desire for the government to own our children? This is a vulgar display of power by the marxists that have infiltrated our systems. Until the age of 18 our children are OUR (the parents) responsibility. We the people do not wish to provide refuge to providers from out of state who have been butchering minor children in other states. This is exactly why you will see an even larger jump in parents who chose alternative "education" (I use that term loosely based on how little education is happening in public schools). I implore you to stop trying to confuse vulnerable children with your social contagions. If they need to be 18 to use a tanning bed, 25 to rent a car, 21 to drink alcohol then how is it ok to chop off body parts or medically castrate anyone under 18? ESPECIALLY without parental consent!
