

Christine Rebstock
Middletown
LD 227

My name is Christine Rebstock, a transsexual woman from CT. I oppose LD 227. The UK recently stopped the practice of administering puberty blockers to children and other countries have stopped medical transition for minor aged kids. Trans people make up .05% of the population so it stands that 99 out of every 100 kids who are gender confused don't have gender identity disorder. Children need proper mental health, not puberty blockers, hormone replacement therapy and/or surgeries. Protect the children and don't pass this bill
