I am against passing this bill. 1. Health care workers are already spread too thin. It takes 6 months or more to get in to see a doctor. Hospitals are closing departments left and right and excellent doctors are leaving the state.

2. Offering underage abortions from out of state is also going to invite sex trafficking into our state. Our state will turn into a One-Stop shop and picking up more of our minor children before they head back out of state. It's not safe.

Not to mention a half a dozen other reasons why. But those are the two big ones. Please do not pass this bill.
