I am absolutely against this bill and this amendment. Both parents should make decisions regarding their child and not be able to cross State borders for life changing, permanent, surgical mutilation of a minor's body and/or seeking an abortion. It is morally wrong to abort (murder) a living human in utero or not. Gender assigning surgery for a minor is cruel and abusive. Brains develop up to age 25, minor's are incapable of making these decisions for themselves and the parents should not be making these decisions for them. When the minor is an adult they get to make decisions for their own bodies.
