

Rachel Vallance  
Rockland  
LD 227

LD227 is a toxic bill which will sweep away the protections of life and parents. It allows for open ended ability for sex traffickers and abusers to bring their victims to Maine where they can be forced by their abusers to have terrible life-ending procedures. Women's healthcare is important, but stopping the heartbeat of a viable unique human is never acceptable. Maine should not allow it, nor should the State of Maine ever interfere with other state's laws and decisions. Gender affirmation goes against many psychological studies and medical studies, indeed transgenderism and other multi-sexual ideologies fall into severe mental health issues listed in the DMV-IV, allowing and promoting it is abuse of minors and should never be allowed. This bill will take away parent's rights, and allow for the mental, physical, and spiritual destruction of the weakest citizens.
