To Whom It May Concern,

I am strongly opposed to this bill. We should not become a sanctuary state for abortions. I am vehemently opposed to the language in this bill that allows children to come here without parental knowledge or consent, have the procedure performed and then be allowed to turn around and sue the parents.

Law enforcement should not be handicapped when encountering an adult who is in possession of a minor without the child's parents knowledge or consent.

This bill is divisive and will further drive us away from a middle ground that this country needs to find.
