

To the members of the Committee On Health Coverage, Insurance and Financial Services

I am submitting this testimony to urge you to vote ought not to pass. Our state and committees like this are acting above the people and against God. This proposed legislation, which would create a sanctuary for anyone and everyone that wants to murder children as well as sterilize or mutilate children and adults. I urge this committee to see the depravity of legislation like this. Please, turn from this wickedness and turn to Jesus Christ. I sincerely love and care for all of you and I want you to see your sin, just as I do continually, and accept the forgiveness of sin offered by God.

This is a short testimony and I want to let you all know I am praying for you. Please, vote ought not to pass and start passing legislation that is not impartial, provide equal protection for all Mainers, stand up for children and adults that are hurting and give ways to help them and not have them mutilating themselves.
