I am in favor of this bill.

Let's get personal. There have been times, in my life, that if I couldn't pay with cash I wouldn't have been able to buy the food for my family from my local farm stand or local family owned general store because I didn't have the gas money to get to town to the big store, Or pay cash on delivery for my heating oil, because the banks were closed and I had no heat. There have been times in my life that I couldn't get a bank account or credit card. Not all have the privilege to bank or have credit extended and on the flip side there are those that choose not to be electronically connected...we've all seen the corruption & fraud.

Thank you for your time and consideration in voting yes.
