

Mark Gorski  
Peaks Island  
LD 1829

I work for Home Start, an affordable housing organization on Peaks Island. Development on island is both logistically difficult and financially burdensome. Any downward pressure on development that can be alleviated by further supporting construction would be very beneficial for our capacity to build for those who need. We at Home Start support LD 1829 as opening up new possibilities for development on places like Peaks that struggle with strict building regulations.
