

Patricia Sansing
Cutler

I am the board president at Beachwood Bay Estates condominium association in Cutler Maine. Our water has been contaminated by the U.S. Navy with PFOA & PFOS. Our families have been affected deeply by this issue and we need the state of Maine to step up and step their standards as low as possible as a health advisory level. Another very concerning factor is our property values are being affected and that is concerning for many people. We as a community in the state of Maine need to step up and protect our citizens and our environment and put our allowable health advisory level a maximum of 20 ppt. Be reminded this is a man-made chemical that has polluted our water and it is your responsibility to protect the state of Maine and it's residence and it's land. Thank you very much
