This program helped cover our out of pocket cost for necessary medical expenses for our child when there were gaps left after insurance coverage. This benefit also offered families living much further away from a CF clinic, assistance with transportation expenses associated with routine care and treatment, I'm sure it's end has caused some great financial hardships, especially given the last year we've all experienced. I feel this program gave our families a bit of breathing room in our budgets and allowed us to take the best care of our children's health needs.
