

Wayne Gray
Orrington

To the Health and Human services committee, thank you for serving, and for considering my thoughts. As a conservative, I am opposed to increasing state sanctioned and sponsored health care for children, that systemically excludes the parents from healthcare decisions made on behalf of their children. It is morally wrong to use government programs to divide families. Gender dysphoria and abortion education should have no place in our public or private school systems, anywhere in the US. It is unconscionable that an elected administration would even consider such a law. Please oppose.
