York

I oppose any proposal that reduces or remove responsibility accountability and transparency from State and enforcement organizations. This is especially true as policing and ICE continue, unstopped by public outcry over abuses and traumas. Is in our systems & institutions

Vulnerable families & communities are bearing the brunt of covid's consequences and our systemic failures. We need transparency at all levels of government to change. States counties and towns will be receiving significant amounts of covid federal dollars. The budget choices we make can help at-risk families and kids with needed local partnerships for housing and care.

In recent months, discussions around kids has focused on "truancy" (Ignoring the physical & psychic demands that 30hr/wk zooming requires ?)

Apparently only kids and families are expected to perform at 100% during a pandemic, but not state regulated agencies.

The hypocrisy is appalling immoral and unconstitutional

Our budgets show our priorities.

Please stand up for communities and climate, education and opportunities, reparative Justice and Revisioning US.

"We refuse to accept that the current conditions [worldwide and in this state] are the best that we can expect." Kumi350
