I am writing today to ask that you not pass this bill which would give unelected officials authority to make decisions on fines, etc. as a small business owner I saw first hand how businesses were treated during this pandemic by our governor and extending this power to unelected officials would create even more power grab. The Governor successfully shut our business down with her mandates to the point where we had no income but still had expenses the entire year of 2020. While people may say this is unfortunate, it surely doesn't feel that way to someone who has worked for years to create and sustain their business. What was done to the gentleman at the brewery in Newry was wrong. Please vote no on this bill.
