

Brittany Molda  
North Berwick

Senator Ned Clayton, Rep. Michelle Meyer & members of the Health and human services committee,

My name is Brittany Molda, I am a resident of North Berwick and a business owner in the state of Maine. I am writing today to submit my testimony on LD 1344 & state that it "ought not pass".

As a small business family, this ongoing state of emergency has been crippling to our financial well-being. People come to America to seek opportunity & yet we small businesses are being crushed by the weight of the ongoing & unnecessary restrictions placed upon us all in the name of public safety, which None of these measures are resolved science, or shown to actually protect the public.

We the people elect our representatives & it is the interests people those elected representatives are supposed to be representing. Unlike free & fairly elected officials, the department of health & human services are appointed. LD 1344 seeks to add more power to these unelected bureaucrats, and strip us, the people, of our Constitutional right of a representative based government.

I ask you, my representatives, that LD 1344 "ought not pass".

Thank you  
Brittany Molda
